

Yue-ming Hsin was born in Tainan, Taiwan, in 1965. He received his BS from National Central University, a Master's degree from National Chiao-Tung University, and a Ph.D. from the University of California at San Diego. All majors were in electrical engineering. He is the university's distinguished professor in the Department of Electrical Engineering at National Central University (NCU), Taiwan. In 1997, he joined Anadigics, Warren, New Jersey (now II-VI Inc.), where he developed GaAs MESFETs and pHEMTs for wireless and optical fiber communications. In 1998, he joined the National Central University's Department of Electrical Engineering. From 2004 to 2005, he was a visiting scholar at the University of Illinois, Urban Champaign. From 2016 to 2017, he was a visiting professor at the University of California at Los Angeles. From 2019 to 2022, he was the Director of the Optical Science Center at NCU. He is currently the overseas editor of Applied Physics Express (APEX) and the Japanese Journal of Applied Physics (JJAP). His research interests include the development of devices and circuits based on heterostructure and wide bandgap semiconductors.
